

### REMARKS

#### Rejection under 35 U.S.C §102

Claims 1-10 stand rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,599,142 to Bu. In particular, the Examiner finds that, with regard to claim 1, Bu discloses (emphasis added) "a carriage part 40 movable along the length of the female connector". The Applicant respectfully disagrees. Bu discloses a body portion 40 of an ejector mechanism 4 (column 2, lines 62-63), wherein the body portion 40 comprises a pair of pivots 400 (column 3, lines 3-4), and wherein "*the pivots 400 of the ejector mechanism 4 are received in the holes 212 of a corresponding guiding projection 21 to pivotally attach the ejector mechanism 4 to the housing 2*" (column 3, lines 20-23). Part 40 of Bu is pivotally attached to the housing of the female connector through pivots received in holes, and is not movable along the length of the connector. Nowhere in Bu is it suggested to make part 40 "movable along the length of the female connector" as recited in claims 1 or 10. In view of the above, the Applicant submits that claims 1 and 10 are patentable over Bu. Should the Examiner disagree, Applicants respectfully request the Examiner to clearly and specifically point out where Bu discloses the above feature in accordance with 37 C.F.R. 1.104(c)(2).

Claims 2-9 stand rejected in view of Bu. The Applicant respectfully disagrees. Claims 2-9 depend directly or indirectly from claim 1. The Applicant submits that at least in view of their dependency, claims 2-9 are patentable over Bu.
